Sold Direct from Nursery to the Planter

1952

STAYMAN WINESAP APPLE ORCHARD IN FULL BLOOM

Aspers, Pennsylvania

Dear Friends and Customers:

It is with great pleasure that we again send out our fruit tree catalog, listing varieties of fruits which are adaptable to your locality, and unsurpassable in quality. The stock which we offer for sale in this catalog is exceptionally healthy and vigorous. It has been well taken care of from seedling to finished tree. No expense has been spared to keep it free of disease and true to name. We are quite sure if you could see this stock in the nursery row there would be no question in your mind as to the quality of all our nursery stock.

Check over this catalog and make out your order for the trees you need. Send it to us. No matter how large or how small your order may be, every effort is made to give you prompt and courteous service. We are sure the trees you will receive will please you in every respect.

Our many years of experience have taught us many things about nursery stock and fruit growing which might be of interest to you. Come and visit us. We will be glad to show you what we have to offer and also try to help solve any problems which might confront you. If you cannot come to the nursery, be sure to visit us and see our display at booth No. 584, Pennsylvania State Farm Show.

We will look forward to pleasant and profitable business relations.

Yours for a thrifty and productive orchard,
ADAMS COUNTY NURSERY & FRUIT FARMS

A VIEW OF OUR LARGE PACKING HOUSE

REASONS YOU SHOULD BUY THE FINEST FRUIT TREES GROWN

Our fruit trees are grown on the best grade whole root seedlings right here in the leading fruit county of Pennsylvania. In addition the soil is especially prepared in advance to planting seedlings, thus providing the richest fruit soil available. We supervise the cutting of buds and the best of care is taken to have every variety true to name. Our Nursery is inspected every year by State Nursery Inspectors, to see that all nursery stock is clean and healthy. A Certificate of Inspection accompanies all purchases.

This price list contains a list of the best fruits for this latitude and their descriptions are not exaggerated or misleading.

Come to the Nursery, if you can do so, make your selection, and take them with you in your automobile or truck and save 1¢ per tree. Otherwise, we will ship them to you by Express, Freight or Parcel Post, as you wish.

To reach the Nursery from Harrisburg, take U. S. Route 11 to Carlisle, then route 34 through Mt. Holly Springs and on to Pitzer's Trucking Station and Garage, turn left there and follow hard road through the village of Aspers, Pa., approximately one-half mile to Nursery. From Gettysburg, take route 34, through Biglerville and on to Pitzer's Trucking Station, turn right. From York, Pa., at west end of city on U. S. 30 turn right on route 234. Follow through East Berlin and Heidlersburg to Adams County Nursery signboard with arrow. Turn right on 334. Follow 334 approximately one mile to another signboard with arrow, turn left. About one mile to Nursery.

We have ideal shipping facilities—a large packing-house on a siding of the Reading Railroad. The trees are carefully packed and should reach the purchaser in the best of condition.

The greatest of care is taken to have all trees, etc., true to label. Any proving not so will be replaced or purchase price refunded, upon proper proof. In no case shall our maximum responsibility exceed the original amount paid.

All orders are accepted on the condition that they shall be void should any injury befall the stock from hail, storm, or other causes beyond our control.

Order early and be sure to get the varieties and quantity you want.

Any sales tax, Federal or State, that may be imposed on nursery stock should be added to the amount of your order.

CARE OF FRUIT TREES

Newly planted trees should be well cultivated the first season, to conserve moisture and to keep down weeds and grass. It is not always good economy to intercrop with grass, small fruits, or grain, unless the young trees are making extraordinary strong growth. When the trees are well established, the spaces between the rows may be used for other crops for a few years, until the trees need the space; but while making their initial growth the trees should not have to compete with other crops for the plant-food in the ground.

One of the most important items in the care of fruit trees is to see that they are trained right from the start. Our two-year-old sizes have the heads already formed, with three to five scaffold limbs well arranged along the trunk to support the head. These trees should be cut back, leaving just the scaffold limbs shortened to the point where it is desired to have the head of the tree.

One-year trees, or whips, should be trimmed to smooth, straight stems, cutting them squarely off at the distance from the ground at which it is desired to have them branch. Usually apples, plums, pears and cherries are headed a little higher than peaches, which should be encouraged to branch as low as possible. The after-pruning is a matter which requires some knowledge of tree growth and habit, as well as the purpose for which the trees are grown.

OUR GUARANTEE

We guarantee every tree to be as represented in grade and quality and if on arrival you do not find them as we say they are, return them to us securely packed and in good condition within five days and your money will be refunded in full. We give no guarantee as to growth.

PACKING OF NURSERY STOCK

All packing will be done in boxes or bales, thus protecting the roots and trees well in shipping. No charge is made for packing or delivery to railroad at Bendersville Station.

SHIPPING OF NURSERY STOCK

The spring shipment of nursery stock begins about March 15 to April 1, depending on an early or late season. Fall shipments about November 15th. Purchasers are requested to state whether they wish stock shipped by freight or express.

PLANTING OF FRUIT TREES

It is a wise thing to choose land that is well-drained because no fruit trees can thrive in a damp, soggy soil. Pear, plum and quince will stand a greater amount of dampness than other fruits, but they are better if they do not have to contend with unfavorable drainage. The best-drained soil is that whose natural elevation conduces to the rapid elimination of surplus water. A gently sloping hillside, free from hollows or swales where late frosts may not linger, affords the best site. Peaches should get the highest locations, because there is less danger from late spring frosts on high ground than on low.

If possible, the land should be prepared as for a good crop of grain, although heavy fertilization is not essential if soil is reasonably fertile.

Have the holes dug in the proper places for the trees, large enough to receive the roots comfortably without bending or twisting them. Stake out the orchard in advance to be sure that the holes get dug in the right places.

When the trees arrive from the nursery, open the package and plant them immediately if it is possible. Be very careful to keep the roots covered to prevent their drying out. In planting, set the trees upright near the center of the holes, spread out the roots evenly, and work fine earth in among them, making sure that they are packed in close contact with the soil. If small air-pockets remain about the roots they will extract moisture from them, so injuring them that the trees may die. Do not apply commercial fertilizer or manure to the roots when planting. Any material of this type used should be applied on the top soil after tree is planted.

In setting out young trees, place them a little deeper than they grew in the nursery. The earthmark on the base of the stem is the best guide in this.

If it is impossible to plant the trees immediately, dig them in. To do this, dig a trench, shovel width and depth, and long enough to hold the roots when they are placed side by side upright. Shift fine earth over the roots, and when the trench is half full, soak them with water and pile on the remainder of the earth. In this temporary planting the trees will keep in good condition for a week or two, until you get them planted.

DISTANCES APART FOR PLANTING

Apples 30 to 40 ft. each way
 Pears 20 to 30 ft. each way
 Plums 16 to 20 ft. each way
 Peaches 18 to 22 ft. each way
 Cherries 20 to 25 ft. each way
 Apricots 16 to 20 ft. each way

Different varieties of peaches may be ordered to get quantity price, but no other fruits may be included.

REMEMBER, the Net Cash Price will be 1¢ per tree less than above prices if you call at our nursery for your trees.

These leading varieties of Peach are listed, just as near as possible, in their order of ripening.

DIXIRED

Very early, yellow, cling, medium size. Ripens two weeks earlier than Golden Jubilee. Tree vigorous and prolific bearer. U. S. D. A. introduction.

RED HAVEN

A cross between Hale Haven and Kalhaven. Tree is vigorous and very hardy, also bears young. Fruit is medium sized and colors to a brilliant red.

JERSEYLAND (N. J. 135)

A large, firm, yellow-fleshed peach ripening a few days before Golden Jubilee. Ships well. The tree is hardy and comes into bearing early.

CUMBERLAND

An excellent, white-fleshed peach. Fruit large, attractive color. Considered by many growers to be equal or better than Belle of Georgia, ripening a few days earlier than Golden Jubilee.

DIXIGEM

Early, yellow, semi-freestone, medium size, good quality. Ripens few days earlier than Golden Jubilee. U. S. D. A. introduction.

GOLDEN JUBILEE

Developed and introduced by the New Jersey Experiment Station. A yellow, early, freestone peach, ripening about three weeks before Elberta, and of good quality. One of the best varieties.

TRIOGEM (N. J. 70)

A red all over, yellow freestone, ripening about 5 to 7 days later than Golden Jubilee. It is superior to the Golden Jubilee because it is firmer, ripens slowly, ships well, colors much better, peaches on the inside of the tree are well colored, and have high quality. Considered to be one of the best New Jersey introductions.

ASPERS, ADAMS COUNTY, PENNSYLVANIA

SUNHIGH (N. J. 82)

A large, smooth, yellow, freestone peach of highest quality introduced by New Jersey Experiment Station in 1938. The flesh is firm, color bright red over an orange ground color. It is the most attractive of any of the newer peaches. Ripens right after Triogem and with Hale Haven. This is a very promising variety.

HALE-HAVEN

Yellow, freestone, large, high red color, firm, and good flavor. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. Very hardy in fruit bud and a heavy bearer. Ripens about 2 weeks before Elberta. Hale-Haven is a new variety, being a cross between the famous J. H. Hale and the well known new variety, South Haven, being originated by the Michigan Experimental Station.

SOUTHLAND

Midseason, yellow, freestone, medium to large round, attractive. Tree vigorous and productive. U. S. D. A. introduction.

REDCREST (N. J. 126)

Large, firm, yellow-fleshed, freestone. Ripens just before Elberta. It is more attractive than Summercrest with a skin color equal to Sunhigh. Tree is vigorous and productive.

SULLIVANS ELBERTA

A sport of Elberta ripening earlier. Identical size, color and shipping qualities. Originated in Georgia.

BELLE OF GEORGIA

Very large peach with red cheek; flesh white and firm, of excellent flavor; fine shipper. Ripens August 1 to 15.

ELBERTA

One of the greatest commercial yellow peaches known. Good shipper. Tree hardy and good grower. Ripens August 20 to September 1.

REDSKIN

A new University of Maryland introduction. A cross between J. H. Hale and Elberta. Tree is vigorous and productive. Fruit is large, yellow, freestone, with deep red blush. Ripens with or slightly after Elberta.

J. H. HALE

Yellow; very large in size and globular in shape; skin thick, smooth and without fuzz; flesh deep yellow, fine-grained, firm, of extra quality; good shipper. It ripens a little after Elberta, and brings highest prices.

WHITE HALE

A large, freestone peach. Very similar to J. H. Hale, only white in flesh.

SHIPPER'S LATE RED

A large, highly colored peach. Very hardy, yellow-fleshed and freestone of good quality. Ripens just after Hale and Elberta.

BRACKETT

A fine, yellow, freestone peach. Similar to Elberta, but of better flavor. A good commercial variety. A good shipper. Ripens a week later than Elberta.

THE ADAMS COUNTY NURSERY AND FRUIT FARMS

✓ AFTERGLO (N. J. 84)

A large, high colored yellow, freestone peach ripening seven days after Elberta. Red coloring carries through the flesh, it being especially red about the pit. A variety that appears hardy and worthy of trial.

LATE ELBERTA

(Sometimes called the Rex.) One of the best of the late varieties, ripening about 10 days to two weeks after Elberta. It is of large size, with yellow flesh. Very desirable market peach.

LEADING VARIETIES OF APPLE TREES

We invite you to compare ours with any grown.

✓ YELLOW TRANSPARENT

Earliest and best; tender, juicy, sprightly subacid; grows upright; bears when young, making good filler. Ripens July 1 to 15.

LODI

A Transparent type apple of much larger size and more firm. It ripens a few days later than Yellow Transparent, but is large and can be picked with Transparent. It should be interplanted for cross pollination.

SUMMER RAMBO

Very large; greenish red, striped, tender, juicy; tree strong grower. Ripens August 15 to September 15.

SMOKEHOUSE

One of the old kinds welcomed in every home. Ripens in September and can be kept in common storage late into the winter.

GRIMES GOLDEN

A good-sized yellow apple of high quality. Ripens in September; can be kept late into the winter.

JONATHAN

Very red apple, smooth, of good size and fine quality. Ripens in September; can be kept in common storage late in the winter.

McINTOSH

Bright, deep red; fine quality. Ripens in September and keeps late into the winter in common storage.

YELLOW DELICIOUS

A good variety, resembling the Red Delicious somewhat in shape. Ripens about same time as Grimes Golden.

TURLEY

A beautiful apple resembling Stayman Winesap and of Stayman type. The fruit does not crack. It looks like a good commercial variety.

STAYMAN WINESAP

Large; mostly covered with red; crisp and juicy. Tree a strong grower. Ripens in October and ready for use soon after picking; keeps late into spring.

YORK IMPERIAL

A medium to large winter apple with yellow skin shaded red; firm, juicy, subacid. An excellent canning and shipping apple and good for export. Ripens in October.

BALDWIN

A fine winter apple. Succeeds well in the Northeastern States.

ROME BEAUTY

Large, round, winter sort, mottled and mostly covered with red; the flavor and quality are very fine. It is also a good late keeper.

RED ROME (Gallia Beauty)

A very high colored sport of the old Rome Beauty, having all the qualities of this apple plus the advantage of greater color.

✓ **RED DELICIOUS**

(Sometimes called Starks' Delicious.) An excellent winter apple. Brilliant dark red skin, shading to yellow at the blossom end and growing somewhat in quince shape; very attractive.

✓ **PARADISE (WINTER SWEET)**

Large, creamy white, rosy cheeked. One of the best sweet winter varieties.

NORTHERN SPY

Large, red winter apple; crisp and juicy. Does well in Northern States.

CORTLAND

A cross between McIntosh and Ben Davis, inheriting the good qualities of both parents. It is a beautiful red, larger than McIntosh, and matures a month later; hangs well to the tree. It keeps late in winter.

✓ **DOUBLE RED JONATHAN**

A red sport of regular Jonathan, similar in every respect except that it colors earlier and produces fruit of higher color.

✓ **DOUBLE RED YORK**

This is a sport of the regular York Imperial. It colors earlier and produces higher color than the regular York Imperial.

✓ **DOUBLE RED DELICIOUS**

A much higher colored fruit than the regular Delicious, coloring earlier, similar in every other respect to the regular Delicious.

✓ **DOUBLE RED STAYMAN**

Similar to the Stayman Winesap, excepting that it colors earlier and produces fruit of higher color.

RED CRAB

This is an all red crab apple, medium size, fruit very handsome, produces a fine red jelly.

CHERRIES

Prices listed are per tree.

SWEET CHERRY (1 and 2 year trees)	1-9	10-50	50 or more
Extra Select 5 to 6 ft., 11/16" up	\$2.35	\$1.85	\$1.50
4 to 5 ft., 9/16 to 11/16"	2.00	1.70	1.30
3 to 4 ft., 7/16 to 9/16"	1.65	1.40	1.00

SENECA

Ripens two weeks before Black Tartarian. Tree is vigorous and productive. Fruit is large and purplish black when ripe.

BLACK TARTARIAN

Sweet. Very large, dark red cherry, becoming black when over-ripe; juicy. Ripens in June.

LAMBERT

Sweet. A fine variety, and one of the largest dark sweet cherries. Flesh firm; rich, juicy. Tree a strong grower and enormous bearer. Ripens in July.

NAPOLEON

Sweet. Large; pale yellow or red; firm, juicy, sweet and productive. Ripens in July.

SCHMIDT'S BIGARREAU

Sweet. Fruit very large, of deep mahogany color; flesh is tender; very juicy, with a fine, rich flavor. Fruit grows in clusters. An excellent shipper; larger than Black Tartarian, and brings good prices. Ripens in middle to last of June.

BING

This is one of the largest eastern sweet cherries. Fruit dark red almost black when ripe. A fine market variety. Ripens mid July.

WINDSOR

Sweet. Large, liver-colored fruit with remarkably firm flesh of fine quality. Tree hardy and prolific. A valuable late variety. Ripens about first of July.

YELLOW SPANISH

Sweet. Large; pale yellow, with red cheek; flesh firm, juicy, and excellent. One of the best light-colored cherries. Vigorous and productive. Ripens middle of June.

MONTMORENCY CHERRY TREES

Large, red and productive. One of the best sour cherries for commercial planting. Ripens in July. When cherry is fully ripe it is slightly tart. The best sour cherry grown.

Our Montmorency cherry trees are propagated from bearing trees, selected for outstanding qualities, by State College Extension Representatives, our County Agent and Orchardists of our County.

Write for quotations on quantity orders.

METHLEY

A new plum that is rapidly gaining favor due to its fine quality and appearance. Fruit reddish purple with red flesh, very juicy with a distinctive flavor. Fruit medium to large size.

BURBANK

Cherry-red. Most profitable among growers for market. Ripens 10 to 14 days later than Abundance.

ITALIAN PRUNE (Fellenburg)

A fine commercial plum, dark purple, medium size, juicy, delicious, fine for canning or drying.

SHIROW

A large, sweet, yellow plum; fine shipper and market sort. Ripens in August.

BRADSHAW

Very large, dark violet red, flesh yellowish green, juicy and pleasant. Tree vigorous, erect and productive. Ripens August.

SHROPSHIRE DAMSON

Late, medium size, dark purple, productive. Best plum for preserving.

PACIFIC

A very vigorous tree, producing large, well-colored fruit. Few plums equal this variety in size, color, and heavy production.

STANLEY PRUNE

A fine prune type plum, excellent quality, freestone, fruit large in size, dark blue skin, greenish yellow flesh, juicy and fine grained. Heavy bearer. Ripens mid-season. A New York State Experiment Station introduction.

GREEN GAGE

A medium, green fleshed, sweet flavored plum. Flesh turns yellowish when ripe.

PEARS

Prices listed are per tree.

Write for quotations on quantity orders.

BARTLETT

Large; buttery, juicy, high flavored; great bearer. This has long been considered one of the choicest canning varieties. A favorite for all uses. Ripens in August.

GORHAM

A Bartlett type pear of good quality ripening two weeks later than Bartlett. This variety is very resistant to blight.

CLAPP'S FAVORITE

Very large; yellow and dull red skin, with russet specks; flesh melting, rich. Resembles Bartlett very much. Ripens in August.

SECKEL

Small; skin rich yellowish brown when fully ripe, with deep brownish red cheek; flesh very fine-grained, sweet, juicy, melting, buttery. One of the richest and highest flavored pears. Equally popular for dessert and pickling. Ripens in September.

KIEFFER

Large; handsome pear with remarkable keeping qualities. Fine for making butter and canning.

BEURRE D'ANJOU

Large; buttery, melting, rich, vinous. The best late fall and early winter pear. Can be kept in cold storage until late spring.

APRICOTS

1 and 2 years old, 4 - 6 ft., ----- \$1.90 aech

QUINCES

Prices listed are per tree

2 year trees

1-9 10-50

4 - 5 ft., ----- \$1.75 \$1.50

ORANGE

Fruit large, bright yellow, of excellent quality. Earlier than Champion.

CHAMPION

A prolific and constant bearer of oval fruit, averaging larger than Orange and ripening later. A long keeper.

GRAPE STALKS

	Each	3 Vines	10 Vines	25 Vines	50 Vines	100 Vines	
2 year, No. 1		\$.50	\$1.50	\$3.50	\$7.50	\$12.50	\$20.00

Grape-vines should be planted 6 to 8 feet apart, in rows 8 feet apart.

DELAWARE

This is considered to be one of the highest quality grapes in cultivation. Berries are bright red and firm. The vines are hardy and productive.

CONCORD

The leading market, vineyard, and home-garden variety. Dark blue berries of fine quality.

WORDEN

Resembles Concord but is sweeter, larger in bunch and berry, and a week to ten days earlier than that variety.

FREDONIA

A very promising black grape, ripening two weeks earlier than Worden. Clusters are medium and compact, berries are large and round, skin thick and tough, the flesh juicy and very good quality.

NIAGARA

The standard white grape. It ripens with Concord but the bunches and berries are larger; very sweet.

MOORE'S EARLY

Bunch medium; berry large, round; vine exceedingly hardy. Ripens three weeks ahead of the Concord, making it desirable for early market.

CACO

The new red grape has a most delicious flavor and is of the highest quality.

CATAWBA

Deep coppery red, becoming purple when ripe, bunches medium, hardy and productive.

NUTS

ENGLISH WALNUT

3 to 4 foot trees		\$3.50	Each	
2 to 3 foot trees			\$2.50	Each

A fine, lofty growing tree, with handsome, spreading head. It produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. Every home-garden should have an English Walnut tree making nice shade.

CHINESE CHESTNUT (Blight Resistant)

The favorite nut of many years ago, wiped out by the devastating blight, again returns as a hardy stock, resistant to the earlier plague. These trees, of Chinese stock, are quick and prolific bearing, usually producing 3 sweet, full-flavored nuts to each burr. Fully as delicious as the native American Chestnut, but a little larger in size. Hardy everywhere that peach trees will grow. Trees are very ornamental with attractive, glossy, rich green leaves on low-sweeping branches.

	Each	10
3 - 4 foot trees		\$3.00

TERMS

Cash with order, or satisfactory reference. When placing an order for future delivery, send a deposit of 25% with order and balance before date of shipment.

REFERENCES AS TO OUR RELIABILITY

We refer you to The Gettysburg National Bank, Gettysburg, Pa., The Biglerville National Bank, Biglerville, Pa., or to any of our thousands of pleased customers.

Come to the nursery if you can in your car or truck. Make your selection and take the trees with you.

VISITORS WELCOME

Visitors are always welcome. Come and we will be glad to show you around. Our many years of experience in growing nursery stock and orchard experience have taught us a lot of things you should know. **No business transacted on Sundays.**

DISEASE FREE STOCK

All nursery stock has been officially inspected by a state inspector and a Certificate of inspection is attached to each shipment.

Amherst, Mass.

July 24, 1951

TO WHOM IT MAY CONCERN:

All of the apple, pear, plum, and sweet cherry varieties propagated and now growing in the nurseries of Adams County Nursery and Fruit Farms, Aspers, Pennsylvania have been examined by the Massachusetts Trueness-to-name Inspection Service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row.

A. P. FRENCH

A Few of the Reasons Why You Should Buy Our Trees

1. **We dig our trees in the Spring and do not store them over the Winter.**
2. **We use Diesel Power to dig our trees. This method gives them an excellent root system.**
3. **We have been producing fine fruit trees for the past 47 years.**
4. **We are located in the largest fruit growing county of Penna.**
5. **We grow and sell direct from the Nursery to the Planter.**

DEPARTMENT OF AGRICULTURE

Nursery Certificate No. 90 (Resident)

THIS IS TO CERTIFY THAT THE NURSERY PREMISES of ADAMS COUNTY NURSERY AND FRUIT FARMS, H. G. Baugher, Prop., Aspers, Pa., including 30.0 acres of stock have been officially inspected and passed in accordance with the provisions of the Act of April 21, 1937, P. L. 318.

Permission is hereby granted this nurseryman to sell, deliver or transport nursery stock during the year ending September 30, 1952; provided that a tag on which an exact copy of this certificate is printed must be attached to each package, box, bale, truckload or carload lot of nursery stock sold or delivered.

This Certificate does not cover the requirements of any special quarantine or regulation promulgated by the Commonwealth or by the United States Department of Agriculture. Furthermore, this certificate does not apply to trees obtained from the Commonwealth of Pennsylvania or uninspected nursery stock from any source.

A separate certificate for the grower of strawberry and bramble plants is required.

This certificate is void after September 30, 1952, but may be revoked for cause

Issued at the State Capitol, Harrisburg, Pa., July 1, 1951.

T. L. GUYTON, Director, Bureau of Plant Industry
